SOUMYA SURYAWANSHI

SOFTWARE ENGINEERING INTERN | FULL-STACK DEVELOPER | AI/ML SPECIALIZATION | B.TECH CS '28

+91 7709299542 | soumyasuryawanshi139@gmail.com | linkedin.com/in/soumyasuryawanshi | Nagpur, India

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in **Artificial Intelligence and Machine Learning**, focused on software engineering and full-stack development, with hands-on experience building and deploying cloud-connected applications at Reliance Industries Limited. Strong in Flutter, Dart, Firebase, Cloud Firestore, Node.js, REST APIs, SQL, C++, Python, Git, and Agile SDLC.

EDUCATION

B.Tech in Computer Science (AI/ML Specialization) | Symbiosis Institute of Technology, Nagpur | 2024–2028

EXPERIENCE

Software Engineering Intern | Reliance Industries Limited | Navi Mumbai | May–Jun 2026

• Engineered enterprise mobility solutions for Reliance's Petchem IT division within a Fortune 500, Agile SDLC environment.

• Built **EmpFlow**, a cross-platform employee database and workforce management system using Flutter, Dart, Firebase, and Cloud Firestore.

• Implemented employee CRUD, Firebase Authentication, admin/staff role-based access control, real-time multi-field search, QR generation/scanning, PDF/Excel exports, and FCM push notifications.

• Designed layered architecture with Provider state management and Firestore real-time listeners; integrated six Firebase services.

• Optimized Firestore collections, indexed queries, and stream caching; internal testing showed **~85% faster lookup**, **150+ records** validated, and **<1 sec** QR scan-to-profile time.

• Used Git/GitHub for version control and deployed the web application through Firebase Hosting.

Machine Learning Intern | iStudio Training Program | 2025

• Architected an end-to-end face recognition pipeline using PCA, ANN, Python, NumPy, and OpenCV.

• Improved robustness across varying lighting and poses through preprocessing and hyperparameter tuning while reducing inference latency.

SELECTED PROJECTS

EmpFlow — Cloud-Based Employee Database & Workforce Management System | 2026
Flutter | *Dart* | *Firebase* | *Cloud Firestore* | *Provider* | *QR* | *FCM*

• Developed a role-governed workforce platform with employee CRUD, smart search, QR identification, PDF/Excel export, and notifications.

• Implemented real-time Firestore data flow, route guards, authentication, storage, Cloud Messaging, and web hosting; testing showed **~85% faster lookup** and **<1 sec** QR verification.

Hybrid MANET Routing Protocol Simulation | 2025
NS-3 | *C++* | *Network Systems*

• Simulated AODV and DSDV across **50+ node** mobile ad-hoc networks, achieving **~94% packet delivery ratio**.

• Analyzed latency, throughput, and routing overhead; work contributed to the published patent application.

Fake News Detection System | 2025
Python | *NLP* | *TF-IDF* | *Logistic Regression* | *Scikit-learn*

• Built an NLP classifier achieving **~91% accuracy** across **8,000+ articles** using TF-IDF, tokenization, and stopword removal.

• Validated performance using cross-validation and precision-recall analysis.

PATENT

Computer-Implemented MANET Routing Performance System | Application No. **202521127182** | Published Jan 2026

TECHNICAL SKILLS

Languages: Python, C++, Java, C, Dart

Software Engineering: Data Structures & Algorithms, OOP, REST APIs, Microservices, SDLC, Agile, Git, GitHub

Mobile & Backend: Flutter, Firebase (Auth, Firestore, Storage, Hosting, FCM), Provider, Node.js, Firebase CLI, Render

Web & Databases: HTML5, CSS3, JavaScript, SQL, Relational Databases, Firestore (NoSQL), Responsive Design

Systems & AI: Linux, NS-3, Machine Learning, NLP, Scikit-learn, NumPy, OpenCV, TF-IDF, PCA, ANN

CERTIFICATIONS

• **Google AI Professional Certificate** — Google, via Coursera (Apr 2026)

• **Deloitte Technology Virtual Job Simulation** — Forage (2026)

• **Red Hat System Administration I (RH124)** — Red Hat Academy

• **Python Programming** — Red Hat Academy
